

## THIRD-PARTY API'S

Date	06 NOVEMBER 2023
Team ID	NM2023TMID02226
Project name	Climate track smart using block chain
Mark	4 marks

As of my last knowledge update in January 2022, there were several third-party APIs and data sources that could be integrated into block chain applications for climate tracking and smart sustainability initiatives. some examples:

### **Weather APIs:**

Open Weather Map: Open Weather Map provides access to current and forecasted weather data, including temperature, precipitation, and wind speed.

### **Environmental Data APIs:**

EPA (Environmental Protection Agency) API: The EPA offers various APIs that provide access to environmental data, such as air quality.

### **Climate Data APIs:**

NASA's Climate Data Services: NASA offers climate data services and APIs that provide information on climate change, greenhouse gas concentrations, and global.
